Customer Reviews

This is a remarkable book, and as far as I know there is nothing like it. This is a complete exploration of the art and practice of kirtan (call-and-response singing) based on the authorâ™s obviously extensive experience. It includes insights into the effects of chanting and the effects of sound (and Sanskrit in particular), helpful guidance in participating and leading, insights on composing your own chants, and an exploration of the deities, whose energies and grace are invoked in chanting. The author also shares some beautiful poetry and wisdom related to chanting and devotion from great saints and ancient works. It is also a personal book. We come to see that we have entered the world

of the author's individual path. And her own extraordinary experiences are some of the highlights. She even contributes nicely to the artwork that is liberally sprinkled throughout. I see books in various fields that claim to be for the beginner and experienced alike, but this is really one of them. Anyone who has been chanting or meditating for a long time will feel it is written for them. And those who have never or rarely chanted or meditated will feel the same way. It is a remarkable achievement in that way. (The glossary alone is worth the price of the book.) Not every reader will share every thought the author has about chanting or its role on the spiritual path. But all will come away enriched and with a greater understanding and appreciation for kirtan, and for bhakti/devotion in general. Highly Recommended.
